Adapted Physical Education (APE) is physical education that is individualized and specially designed to address the needs of students with disabilities who require adaptations or modifications to be physically active, participate safely, and make progress toward New Jersey’s Academic Standards for Physical Education. The need for Adapted PE is based on student assessment. At times throughout the year students will be successfully included in a general physical education class with their typically-developing peers with the support services they need.

Standards:
2.5 MOTOR SKILLS DEVELOPMENT
All students will utilize safe, efficient, and effective movement to develop and maintain a healthy, active lifestyle
2.6 FITNESS
All students will apply health-related fitness concepts to develop and maintain a healthy, active lifestyle.
